

**BJ ANGUS GENETICS**

# **23<sup>RD</sup> SPRING PRODUCTION SALE**

**THURSDAY, MARCH 13, 2025 • 12:30 PM • AT THE RANCH • MANHATTAN, KANSAS**

## ANGUS GENETICS

John & Bonnie Slocombe • (785) 539-4726 • [www.bjangus.com](http://www.bjangus.com)  
4291 McDowell Creek Road • Manhattan, Kansas 66502

### *Welcome to BJ Angus Genetics 23<sup>rd</sup> Spring Production Sale!*

Dear Friends & Fellow Beef Producers,

It's a pleasure to welcome you to our 23rd Annual Spring Production Sale. We invite you to go through our offering as we believe it is loaded with value. We build bulls and females that excel in calving ease, quiet disposition, rapid growth, carcass quality and maternal traits. It's a simple philosophy, but one that has worked for us and given BJ Angus Genetics the pleasure of marketing seedstock for over 30 years. We guarantee our cattle will work for you.

Travis Sherfick, Brian Walt and I have been a good team for several years. Keeping you supplied with genetics that keep you in business is very important to us. We have many tools to help select bulls and females that will fit your program and help you turn a profit. If you need help understanding the EPDs and/or Method Genetics values we are ready to assist you, just let us know.

Cattle prices look good and all the economists we follow are predicting strong prices for the next few years due to lower supplies of cattle nationwide while demand stays strong. Now is the time to plan ahead to make sure you are producing as many quality pounds to sell as possible.

Please go to our websites, [www.bjangus.com](http://www.bjangus.com), or [www.sherfickcattleco.com](http://www.sherfickcattleco.com) to view updated EPDs, \$Value Indexes, sortable Excel spreadsheets, videos of each animal in the sale (March 1) and an online catalog. If you are unable to join us at the sale, please consider logging on [www.Live-ag.com](http://www.Live-ag.com) to bid online.

***We are so THANKFUL for your TRUST in our FAMILIES and our CATTLE.***

Sincerely,

John & Bonnie Slocombe

### SALE CONSULTANT

Matt Myers, Myers Cattle Services (405) 315-7258  
Tom Dalbey, Dalbey Consulting (404) 372-0973

### SCHEDULE OF EVENTS

#### Wednesday, March 12:

12 Noon: Cattle available for viewing

#### Thursday, March 13:

9:00 AM: Rolls & Coffee | Cattle available for viewing

11:00 AM: Complimentary brisket lunch sponsored  
by Beef Belt LLC, Scott City, KS

12:30 PM: Sale begins! Cattle sell in sale book order

**We encourage you to become familiar with the Calf Buy Back Program offered on commercial calves out of bulls purchased in this sale. See Page 50 for more details.**

**Buyers may deduct \$50 per lot or group from the purchase price if picked up sale day.**

### FOR MORE INFORMATION, CONTACT:

John Slocombe: (785) 532-9777 • [john@bjangus.com](mailto:john@bjangus.com)  
Travis Sherfick: (785) 769-7014 • [travissherfick5@hotmail.com](mailto:travissherfick5@hotmail.com)  
Brian Walt: (785) 769-4889 • [bjwalt76@yahoo.com](mailto:bjwalt76@yahoo.com)

### INSPECTION OF CATTLE

The cattle are available for inspection at BJ Angus Genetics after March 7, 2025. Prior to March 7, the registered females owned by BJ Angus Genetics are available for inspection anytime, Manhattan KS; all the bulls and the registered females owned by Travis Sherfick are available for inspection at Sherfick Cattle Company, WaKeeney KS; the commercial Angus bred heifers are available for viewing at Brian Walt's Ranch, Collyer, KS.

### SIGHT UNSEEN PURCHASES

If you would like assistance in selecting bulls/females, please call or email John, Travis or Brian. We will assist you in determining the best possible bulls/females for your operation. You may leave bids with us if desired, we will buy the cattle as cheap as we can. Our programs are built on trust and integrity.

### SUPPLEMENTAL INFORMATION

A Supplement Sheet will be available sale day with complete and updated information. This information will also be posted on our websites, [www.bjangus.com](http://www.bjangus.com) and [www.sherfickcattleco.com](http://www.sherfickcattleco.com). Announcements made by the auctioneer regarding the cattle selling takes precedence over the information listed in this sale book or the Supplement Sheet.

### TERMS AND CONDITIONS

Cattle will sell under the Suggested Terms & Conditions of the American Angus Association ([www.angus.org/Pub/suggested\\_sale\\_terms.pdf](http://www.angus.org/Pub/suggested_sale_terms.pdf)). Purchaser assumes the risk of death or injury to their livestock immediately after the animal is sold. Cattle purchases are to be settled (via check or cash) before pickup or delivery.

### LIVESTOCK MORTALITY INSURANCE

James Bessler (815) 762-2641

### HOTEL INFORMATION:

Fairfield Inn, Manhattan, KS, (785) 539-2400  
Hampton Inn, Manhattan, KS, (785) 539-5000  
Hampton Inn, Junction City, KS (785) 579-6950

### LIABILITY

All persons viewing the cattle before, during, and after the sale do so at their own risk. The owners assume no liability, legal or otherwise, for injury, loss, or damages.

Look here! Outcross pedigree with top tier EPDs for growth, maternal, feet, marbling and \$M. Nice bull!

Rawhide is a high use sire in the breed to produce highly maternal cattle with longevity. 3133 should produce beautiful replacement females with strong growth and maternal EPDs.

Full brother to Lot 80. Outstanding maternal genetics!

Outstanding Craftsman son from a valuable dam that descends from Confidence Plus. 4125 is a deep bodied, moderate frame, calving ease bull with massive muscle and extremely smooth. Top of the breed rankings for feet, heifer pregnancy and \$M. His sire was the No. 1 used sire in the breed in 2024 and is regarded as a producer of fabulous females.

## BRED COMMERCIAL HEIFERS

Twenty home raised heifers with average ROI of 239. The heifers were AI bred 11/29/24 to GAR Transcendent. GAR Transcendent has a Method Genetics Retained Ownership Index (ROI) of 299, ranking him in the top 3% of the unique Method Genetics database. After AI, the heifers were exposed to sons of GAR Transcendent. Vaccination & Health: OCV. Pyramid with Response & Black-

leg at 75 days of age. Pyramid 5, Blackleg and Dectomax injectable at 250 days of age followed with Pyramid 5 three weeks later. Vista 5 VLS and Ivermectin Pour On pre-breeding. EID tags. Free delivery in Kansas.

## The Method Matters

The Method Genetics index values are derived from Method Genetics EPDs combined with industry-focused economic weightings. The Method EPDs are generated from a multi-trait, 'single-step' genetic evaluation that uses performance measures, ancestral pedigree,

and available DNA genotypes. This single-step approach incorporates the genotypes directly into the genetic evaluation process and was implemented at Method in the summer of 2014.

### MATERNAL PRODUCTION INDEX (MPI):

The Maternal Production Index is reported in dollars per calf produced from the breeding herd with Angus-based genetics. It encompasses direct and maternal calving ease, heifer pregnancy, weaning growth, maternal milk, and mature size differences in a scenario where replacement females are retained and calves are marketed at weaning.

### QUALITY POUNDS INDEX (QPI):

The Quality Pounds Index is reported in dollars per calf for herds with Angus-based genetics. It focuses on the terminal side of the herd's business for feedlot gain and carcass merit genetic differences. There are no provisions for calving ease or maternal traits, with the assumption that all calves are under a retained ownership scenario fed out and marketed on a premium quality-based grid.

### Method Genetics' Selection Index Key Used in the catalog

Method  
Genetics  
Index / Percentile

MPI / %

167 / 1

QPI / %

166 / 1

ROI / %

300 / 1

### METHOD GENETICS INDEX PERCENTILE RANKS (%):

A numeric ranking of the animal's Index values on a 1% to 100% scale. A lower numeric value is considered more favorable. For example, a 25% presented with an index indicates that animal is in the upper 25 percent of the animals in the Method Genetics genetic evaluation for calves born in the last five years.

### RETAINED OWNERSHIP INCOME (ROI):

Cattle producers interested in a complete production system approach from conception through carcass end-point can use the Retained Ownership Income index. ROI ties together reproduction, calving ease, maternal genetic merit, growth throughout the calf's lifetime, and quality based carcass merit in an Angus-based herd. The ROI is reported in dollars per calf produced in the herd, and consolidates the sub-indices of MPI and QPI.

## THE BJ ANGUS GUARANTEE

We guarantee that all breeding cattle sold at a BJ Angus Genetics Sale, both bulls and females, are fertile to the best of our knowledge. If a bull is injured anytime during the first breeding season following the sale so as to make them functionally infertile, we will provide you a satisfactory replacement, if available, or issue you a credit equal to the bulls purchase price minus the salvage value received for that bull. If a female is determined a non-breeder, then we would ask you to sell her and would offer you the difference of her purchase price minus the salvage value as a credit in any future BJ Angus Genetics sale. This guarantee is in addition to the Sale Terms and Conditions of the American Angus Association which also apply. This guarantee is not a life insurance policy. We will not replace a dead animal if it is killed or dies for any reason. All credit is good until it is used and does not expire. We simply ask you contact us before you cull any infertile animal.

## A WORD ABOUT FREE DELIVERY

BJ Angus offers its customers free delivery in the lower 48 states. As part of that delivery we work with reputable livestock transportation companies that we feel comfortable with in the handling of your cattle in both a professional and conscientious way. BJ Angus Genetics will do everything possible to deliver your cattle to a point that is convenient for both you and the trucking company. In some cases where the cattle are from multiple owners loaded on the same truck, it is necessary for the buyer to meet the truck at a central location such as a livestock auction or veterinary clinic relatively close to them. We also encourage the drivers to be as flexible as possible and request that they not deliver your cattle in the middle of the night if avoidable. Most of the cattle to be delivered from the sale are delivered within 45 days after the sale. If, for any reason, you desire an expedited delivery, please notify John Slocombe at (785) 532-9777 or email [john@bjangus.com](mailto:john@bjangus.com) and we will make arrangements for quicker delivery. Commercial heifers will be delivered free in Kansas only.

## BJ ANGUS GENETICS VACCINATION PROGRAM

### Calves at 205 day Pre-Weaning (March)

Bovi-Shield Gold One Shot  
Inforce 3  
Moraxella Bovis Bacterin-Toxoid Alpha 7/MB-1  
Valbazen Drench Wormer

### Weaning Calves (April)

Bovi-Shield Gold One Shot  
Dectomax Pour-On

### Yearling Heifers (>30 days Pre-Breeding)

Calfhood (<365 days of age)  
Bovi-Shield Gold FP5 VL5  
Dectomax Pour-On

### Cows (>30 days Pre-Synchronization)

CattleMaster Gold FP5  
Staybred VL5  
Dectomax Pour-On

### Bulls (Pre-Sale)

Breeding Soundness Examination  
Bovi-Shield Gold FP5 VL5 HB  
Cydectin Pour-On

All animals have been tested for PI BVD and found to be free of this disease.

Dr. Dave Rethorst, Beef Health Solutions  
Dr. Lee Penner, Penner Veterinary Services  
Dr. Curt Vogel, Heritage Veterinary Services

## GLOSSARY OF TERMS AND ABBREVIATIONS

**Expected Progeny Differences (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. The EPD will be preceded by an "I" and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

### GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility EPD (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

### MATERNAL

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

### CARCASS

**Carcass Weight EPD (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

### \$VALUE INDEXES

**Maternal Weaned Calf Value (\$M)**, an index value expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)**, an index value expressed in dollars per head that includes all traits that makeup \$M and \$B.

### METHOD GENETICS

**Maternal Production Index (MPI)**, an index reported in dollars per calf produced from the breeding herd with Angus-based genetics. It encompasses direct and maternal calving ease, heifer pregnancy, weaning growth, maternal milk, and mature size differences in a scenario where replacement females are retained and calves are marketed at weaning.

**Quality Pounds Index (QPI)**, an index reported in dollars per calf for herds with Angus-based genetics. It focuses on the terminal side of the herd's business for feedlot gain and carcass merit genetic differences. There are no provisions for calving ease or maternal traits, with the assumption that all calves are under a retained ownership scenario fed out and marketed on a premium quality-based grid.

**Retained Ownership Income (ROI)**, an index reported in dollars per calf produced in the herd, and consolidates the sub-indexes of MPI and QPI. Cattle producers interested in a complete production system approach from conception through carcass end-point should use the ROI index as it ties together reproduction, calving ease, maternal genetic merit, growth throughout the calf's lifetime, and quality based carcass merit in and Angus-based herd.

## PERCENTILE RANKINGS FOR EPDS AND \$INDEXES

**Percentile rankings for EPDs and \$INDEXES allow you to see how the cattle in the sale offering stack up to any Angus bull/female, NOT just those in our sale offering.**

### REVENUE SHARING & SEMEN INTEREST

BJ Angus Genetics or Sherfick Cattle Company retains a 1/3 semen interest in every bull sold. This means the bull is totally in your control in how you want to handle him and you get 100% of the salvage value of the bull. Simply, we are reserving the right to a share of semen sales revenue from the bull if, at some time in the future, semen sales become a possibility. If you sell the bull to another breeder, BJ Angus Genetics or Sherfick Cattle Company retains the semen interest.

It is unlikely that large amounts of semen will be sold from many bulls. However, bulls are often "discovered" later in life, after proving themselves in the breeding pasture. It is for this reason we keep a semen interest in all bulls sold.

Even bulls sold to commercial herds may become popular at a later time, as more carcass data is collected on their calves.

If you purchase a bull that we retain an interest in and you choose to collect semen from that bull as an "insurance policy" for your own use, that semen is 100% yours. BJ Angus Genetics or Sherfick Cattle Company may also wish to collect semen from the bull either for in-herd use or to build a jointly-owned semen bank for sale purposes.

If you are not interested in collecting semen on the bull, BJ Angus Genetics or Sherfick Cattle Co. has the right to collect the bull, at their own expense, for their own use. The bull would be collected at your convenience.

# HERE'S THE **BEST** **OFFER** YOU'LL HAVE **TODAY!**

Our good friend, Brian Walt, W6 Cattle Co., Collyer, Kansas, is a diversified commercial cow-calf producer and cattle feeder. For the past few years, Brian has offered several outstanding, home-raised commercial Angus heifers in our spring production sale. As a cow-calf producer, cattle feeder and backgrounder, Brian recognizes the added value of BJ genetics throughout the supply chain, and would like to bid, buy, or partner on your commercial calves.

## **ELIGIBILITY:**

- Steers or heifers
- Weaned to 800-850 lb calves

## **REQUIREMENTS FOR ELIGIBILITY:**

- Advanced notification on calves to sell
- Calves must receive two vaccinations for respiratory disease (pre-weaning & branding)
- Calves must be sired by bulls purchased in BJ Genetics sale

## **WHAT WE DO:**

- With advanced notice, we are willing to bid, buy or partner with seller.
- We are willing to share the feedlot data and carcass summary.

We will background weaned calves until they reach appropriate weights to enter the feedlot. Finished cattle will sell through USPB and be processed at a National Beef plant. We will share all the data, regardless of a seller's level of participation. Seller's choosing to partner with us on their calves will receive their pro-rated share of profits after all expenses have been deducted.
